### AT WATERWELL, WE UNDERSTAND THAT YOU HAVE A VERY BUSY SCHEDULE...

Waterwell is aware of how hectic your schedule may be and we always try to be as efficient as possible. Whenever an appointment for a service call is made, an arrival-time window is always provided. Usually it is no more than a maximum of four hours. For example, if an appointment window is marked between 3:00 and 6:00, it does not mean that we will be in front of the door at exactly 3:00 but rather this means we will be there within that time frame. An exact time is never guaranteed since we cannot determine how long the call before yours will take. Rest assured that if a technician is delayed for any reason, you will be advised as soon as possible. We always try our best to work together with our customers to book appointments that are convenient you.

Waterwell operates seven days a week throughout the season!

### RIDDLE

**Question:**

A farmer had a stone that he used to measure grain on his scale. One day his neighbor borrowed the stone, and when he returned, it was broken into four pieces. The neighbor was very apologetic, but the farmer thanked the neighbor for doing him a big favor. The farmer said that now he can measure his grain in one pound increments starting at one pound all the way to forty pounds (1, 2, 3, 17, 29, 37, etc.) using these four stones. How much do the four stones weigh?

*Thank you*  
to the following members of our team for  
their dedication and hard work over the  
years

<b>Betty Bond</b>	Bookkeeper	Gold watch, Spa weekend	Retired in November 2004 after 11 years
<b>David Somerville</b>	Crew Chief	Gold watch	Will start his 10 <sup>th</sup> year this spring
<b>Tomasz Turek</b>	Crew Chief	Gold watch	Will start his 8 <sup>th</sup> year this spring
<b>Robert Harriet</b>	Crew Chief		Will start his 5 <sup>th</sup> year this spring
<b>Mario Paiz</b>	Crew Chief		Will start his 5 <sup>th</sup> year this spring
<b>Abner Pazos</b>	Crew Chief		Will start his 5 <sup>th</sup> year this spring
<b>Ben Lecker</b>	Crew Chief		Will start his 4 <sup>th</sup> year this spring
<b>Emily Shearer</b>	Administrative Assistant	Will start her 4 <sup>th</sup> year this spring	
<b>Michal Smythe</b>	Crew Chief		Will start his 4 <sup>th</sup> year this spring
<b>Carlos Alas Pena</b>	Technician		Will start his 3 <sup>rd</sup> year this spring
<b>Juan Miguel</b>	Technician		Will start his 3 <sup>rd</sup> year this spring
<b>Godson Quist</b>	Crew Chief		Will start his 3 <sup>rd</sup> year this spring
<b>Jeff Seris</b>	Crew Chief		Will start his 3 <sup>rd</sup> year this spring

I consider myself a perfectionist and sometimes this gets me in to trouble or problems. When I do things, I like to do them properly the first time rather than to do something in the interim until it can be done correctly. This transcends to my profession and interactions I have with others in the normal course of work. People tell me it is impossible and it is an unrealistic goal to be perfect and that I push too hard. Maybe I am being unrealistic until I read something interesting the other day. I think you will find the following facts surprising; 22,000 cheques will be deducted from the wrong bank account in the next 60 minutes, twelve babies will be given to the wrong parents today, two planes landing at the Chicago O'Hare airport will be unsafe, 55 malfunctioning ATM machines will be installed around the country today. A first impression will be "this is unbelievable!" well if 99.9 % is good enough all of these facts are true. So what we can learn from this is that there always has to be a reference point. We should compare our efforts not only to things that are worse to make us feel better, but also to those that are better, so that we have goals to obtain. We can pat ourselves on the back for getting this far and realize we are doing well but use this as encouragement to try and drive us closer to the 100 % mark. There is always room for improvement, we may never get to perfect but we can always try.

**Mark Wiegard**

Answer:  
The stones weigh 1 pound, 3 pounds, 9 pounds and 27 pounds. These can be used in combination with each other on both sides of the scale to come up with counterweight from 1 to 40 pounds.
